Ref. lwk

January 15 2008

as of enclosed list

Answer to the additional information in accordance with the Espoo Convention concerning the Nord Stream Gas Pipeline

By letter of November 7 2007 you have asked us to submit any comments on the information document which describes the current "*Status of the Nord Stream pipeline route in the Baltic Sea*".

From 26 November 2007 to 14 January 2008 a public hearing was carried out in Denmark. We hereby enclose the comments received on the information document during the public hearing in Denmark:

- Danish Coastal Authority, (Kystdirektoratet) 7 January 2008
- Royal Danish Administration of Navigation and Hydrography, (Farvandsvæsenet), 10 January 2008
- Bornholms Region, 10 January 2007
- Danish Maritime Authority, (Søfartsstyrelsen), 10 January 2008
- Danish Energy Authority (Energistyrelsen) 13 January 2008

The authorities express their concern about the route north of Bornholm, because it is very close to the major fairway for ships between Sweden and Bornholm.

The comments have not yet been translated from Danish to English.

Yours sincerely

Laila Wieth-Knudsen
